Mike **Pols**

PhD Candidate - Computational Materials Science - Eindhoven University of Technology, The Netherlands

m.c.w.m.pols@tue.nl | Google Scholar | 0000-0002-1068-9599 | mikepols | 5th of July, 1996

Leveraging extensive experience in training reactive and machine-learning force fields, I have investigated ion, phase, and lattice dynamics of halide perovskites. My goal is to advance machine-learning models beyond energy and force predictions to also cover charges, electronic structure, and spin properties, enabling applications in catalysis, optoelectronics, and spintronics.

Research Experience

Eindhoven University of Technology (TU/e)

Eindhoven, NL

PhD Candidate in Materials Simulation & Modelling (MSM) *Mar. 2021 - Feb. 2025*

Computational modelling of halide perovskites using atomistic simulations, with a focus on their ion, phase, and lattice dynamics.

MSc in Applied Physics (Cum laude), MSc in Chemical Engineering (Cum laude) *May. 2018 - Feb. 2021*

- Grade Point Average (GPA): 9.4/10
- Master thesis: A Reactive Force Field for Large Scale Simulations of Metal Halide Perovskites (9.5/10) [Pub. 7]
- Industrial internship at Software for Chemistry & Materials (SCM) on infrared and Raman spectroscopy in solids (9.5/10)
- Research assistant at TU/e investigating atom-thin 2D materials for perovskite solar cells using computational modelling [Pub. 18]

BSc in Applied Physics (Cum laude), BSc in Chemical Engineering (Cum laude) *Sep. 2014 - Apr. 2018*

- Grade Point Average (GPA): 9.3/10
- Bachelor thesis: Triplet-triplet annihilation of phosphorescent host-guest materials for OLEDs (9.5/10)
- Research assistant at TU/e investigating triplet-triplet annihilation in phosphorescent host-guest systems for OLEDs [Pub. 19]

Teaching & Mentoring

Courses

TU/e, NL

Advanced Materials Modelling using Multiscale Methods (3MQ110) *2021 - 2023*

- Design of the course materials, including programming exercises and introductory density functional theory simulations
- Teaching assistant for hands-on programming exercises for density functional theory
- General introduction to use of high-performance computing (HPC) systems
- Supervision of student projects using classical and quantum simulations of halide perovskites

Computational Materials Science (3MN200) *2019 - 2020*

- Teaching assistant for hands-on density functional theory calculations with VASP
- General introduction to use of high-performance computing (HPC) systems

Student Mentoring

Mentored a variety of students at various levels during their thesis and internship projects:

- Master students (5) with projects covering ion migration, surface and grain boundary stability, and crystallization of halide perovskites
- Bachelor student (1) with project focused at exploring the compositional effects on structural chirality in chiral perovskites

Honors & Awards

Jun. 2024 **Participant of 73rd Lindau Meeting,** Lindau Nobel Laureate Meetings *Lindau, Germany*

Feb. 2023 **HPC SYSTEMs Inc. Poster Award,** APATCC-10 *Quy Nhon, Vietnam*

Nov. 2021 **Best Poster Prize,** ACOS conference 2021 *Eindhoven, NL*

Sep. 2021 **Nominated: Best Student Assistant (Applied Physics, TU/e),** STOOR Education Awards *Eindhoven, NL*

Jun. 2020 **Participant of 70th Lindau Meeting,** Lindau Nobel Laureate Meetings *Lindau, Germany*

May. 2018 **ALSP Scholarship (top 1%),** Eindhoven University of Technology (TU/e) *Eindhoven, NL*

Jul. 2014 **Bronze Medal (128th out of 291),** 46th International Chemistry Olympiad *Hanoi, Vietnam*

Jun. 2014 **Gold Medal (4th out of 4090),** Dutch National Chemistry Olympiad 2014 *Amsterdam, NL*

Skills

Languages	**Dutch**: native, **English**: full professional proficiency, **German**: elementary
Programming	Python, Matlab, Mathematica, Fortran, LaTeX
Software	VASP, AMS, Phonopy, OVITO, VESTA, LAMMPS

Presentations

NWO CHAINS 2024 — *Veldhoven, NL, Dec. 2024*
Talk: Structural and Dynamic Chirality in 2D Halide Perovskites

Elementary School Tour at Applied Physics @ TU/e — *Eindhoven, NL, Jun. 2024*
Lecture: What Does a Computational Scientist Do At TU/e?

KNCV-CTC 2024 — *Eindhoven, NL, Apr. 2024*
Talk: Stability of Metal Halide Perovskites: Insights from Multiscale Reactive Molecular Dynamics Simulations

NWO Physics 2024 — *Veldhoven, NL, Jan. 2024*
Talk: Structural Descriptors for Chiral Halide Perovskites at Finite Temperatures

IUPAC | CHAINS 2023 — *The Hague, NL, Aug. 2023*
Talk: Reactive Molecular Dynamics Simulations of Metal Halide Perovskites

Elementary School Tour at Applied Physics @ TU/e — *Eindhoven, NL, Jun. 2023*
Lecture: What Does a Computational Scientist Do At TU/e?

CCER Seminar (3rd Year) — *Eindhoven, NL, Apr. 2023*
Talk: Multiscale Modelling of Defects in Halide Perovskites: Insights from a Variety of Computational Methods

Asia Pacific Conference of Theoretical and Computational Chemistry (APATCC-10) — *Quy Nhon, Vietnam, Mar. 2023*
Talk: Reactive Molecular Dynamics Simulations of Defect-Induced Degradation in Halide Perovskites: Insights from Machine Learned Force Fields and ReaxFF

2022 MRS Fall Meeting — *Boston, United States, Nov. 2022*
Talk: Multiscale Modelling of Defects in Halide Perovskites — Implications for the Phase Stability and Degradation Reactions Induced by Thermochemical Stress

Computational Methods in Nanothermodynamics — *Trondheim, Norway, Apr. 2022*
Talk: Reactive Molecular Dynamics Simulations of Metal Halide Perovskites

Green Week Lunch Lecture — *Eindhoven, NL, Mar. 2022*
Talk: What can I do as a physicist in the field of sustainability within Materials Simulations & Modelling (MSM)?

Han-sur-Lesse Winterschool 2021 — *Han-sur-Lesse, Belgium, Dec. 2021*
Lecture: A Reactive Force Field for Large Scale Simulations of Metal Halide Perovskites

CCER Seminar (First year) — *Eindhoven, NL, Apr. 2021*
Talk: A Reactive Force Field for Large Scale Simulations of Metal Halide Perovskites

Posters

DuComS Day 2023 — *Utrecht, NL, Nov. 2023*
Poster: On-the-fly Machine Learned Force Fields for Halide Perovskites: How Fast Do Defects Move?

NWO Physics 2023 — *Veldhoven, NL, Apr. 2023*
Poster: On-the-fly Machine Learned Force Fields for Halide Perovskites: How Fast Do Defects Move?

Asia Pacific Conference of Theoretical and Computational Chemistry (APATCC-10) — *Quy Nhon, Vietnam, Feb. 2023*
Poster: What Happens at Surfaces and Grain Boundaries of Halide Perovskites: Insights from Reactive Molecular Dynamics Simulations of $CsPbI_3$ **(HPC SYSTEMs Inc. Poster Award)**

Next-Generation V+ PV Materials 2022 — *Groningen, NL, Jul. 2022*
Poster: Atomistic Insights Into the Stability of Inorganic $CsPbI_3$ from Reactive Molecular Dynamics: The Impact of Defects, Surfaces and Grain Boundaries

Physics@Veldhoven 2022 — *Online, Jan. 2022*
Poster: Atomistic Insights Into Degradation Pathways Of Inorganic Metal Halide Perovskites

Applied Computational Science (ACOS) conference 2021 *Eindhoven, NL*
Poster: Atomistic Insights Into the Degradation of Inorganic Halide Perovskite $CsPbI_3$ **(Best Poster Prize)** *Nov. 2021*

2020 Virtual MRS Spring/Fall Meeting & Exhibit *Online*
Poster: A Reactive Force Field for Large Scale Simulations of Metal Halide Perovskites *Nov. 2020*

Internet Conference on Theory and Computation of Halide Perovskites (ComPer) *Online*
Poster: A Reactive Force Field for Large Scale Simulations of Metal Halide Perovskites *Sep. 2020*
